

Python Comments

 [javatpoint.com/python-comments](https://www.javatpoint.com/python-comments)

Python supports two types of comments:

1) Single lined comment:

In case user wants to specify a single line comment, then comment must start with `##`

Eg:

2) Multi lined Comment:

Multi lined comment can be given inside triple quotes.

eg:

```
1. "
```

eg:

```
1. print"Hello Python"
2. "
```
